In addition, Cash Scholarship worth **₹15+ Crores** will be given to students performing exceptionally well in the exam, at the territory as well as at the national level.

# Immense, Incomparable & Vital

That's the significance of these  
academic yardsticks when it is about planning  
for your child's academic goals and career path

## **Knowing Current Academic Capabilities**

You & your child need to discover your child's current academic capabilities especially aptitude, comprehension skills, analysing capability, general IQ & IQ specific to the career choice.

## **Knowing Academic Inclination for a stream**

No one career is for every child. It is important for you & your child to discover his / her subject-wise aptitude at an early stage, so that correct stream is chosen in class XI to prepare earnestly for a successful career in the chosen stream.

## **Discovery through Scientifically Designed Tests**

All the above can't be done through just any test. A child needs scientific testing that also has a pattern similar to various prominent National Level competitive & scholastic exams.

## **Realising National Level Academic Standing**

Career dreams can't be realised without knowing where you stand in the competition. Practically all career defining competitive exams as well as top scholastic exams are conducted at the National Level. Whether a child is choosing Engineering, or Medicine, or Pure Sciences, Law, CA, Fashion, Business et al., he / she needs to know his / her National Level Standing (Success Potential / Rank Potential Index) for the relevant exams at the earliest possible but not later than end of class X. Though it is better done late than the actual exam day.

# And the only way to achieve all of this together is by appearing in

After all the analysis, you & your child need to know what needs to be done for unravelling his / her total potential (manifested & hidden). This is the most crucial step. It needs to be done carefully. Your child will be happy working hard, with this clarity rather than feel stressed or even depressed. It is evident that Students' training must start with proper analysis of their potential & after making of a comprehensive plan to achieve the goals. This can be best done with the assistance of an honest, sincere, and dedicated expert or institution.

FTRE is also an Admission Cum Scholarship Test to qualify for a  
FIITJEE Classroom / Integrated School / Live Interactive Online Classroom Program.

(Subject to Terms & Conditions)

Students will get a historic opportunity to earn unprecedented Scholarships worth **₹ 600+ Crores** (100% increment from last year) on FIITJEE Program & Hostel Fees. In addition, Cash Scholarship worth **₹ 15+ Crores** (50% increment from last year) will be given to students performing exceptionally well in the exam, at the territory as well as at the national level.

To avail Cash Scholarships, a student has to appear either in an Offline Test or in a Computer Based Test.

*An investment in FIITJEE is an investment in lifelong success.*

## Children are like rough diamonds.

We need to recognise their hidden potential, mentor them, motivate them to unravel their full potential. Every Student cannot be the best in the world, but every Student can be mentored & nurtured to unravel his / her 100% total potential.

- 1.** Children need to develop high analytical skills & ability to solve problems creatively and have a solid grounding of fundamental concepts, for success not only in various scholastic & entrance exams but also in their career & life.
- 2.** Potential alone cannot get children desired success. Children do not unravel their total potential (manifested & hidden) unless carefully harnessed by specifically trained, dedicated & sincere experts.
- 3.** Children need access to such study material & training that is Pattern Proof i.e. irrespective of the unpredictable pattern of Scholastic & Competitive Exams, they are prepared for it completely. And this needs to be available to them in a single system of training and not from multiple sources, which will cause unnecessary confusion & stress.

4. Every child can not get NTSE scholarship, or qualify in Junior Science Olympiad, Maths & various other Olympiads. However, you need to understand the true value of preparing for these “Milestone Scholastic Exams”, they play an important role in helping your child gradually build many important skills. It is our sincere advice to all students of class VI, VII, VIII, IX, & X to prepare for them in all earnest.
5. It is a known fact that the real success and happiness in career & life comes to those who possess high value system & culture. Make sure to give such schooling & coaching to your child where the culture breathes Truth, Transparency & Commitment.
6. Children do not thrive in education environment of uncertainty, false hopes, stress, & strain. Children thrive if exposed to ethical pressure, with an honest feedback system that does not allow anyone to misrepresent or tell lies to them. You & your child should be presented with the true picture every time. This truth & transparency will not allow your child to be over-confident, while passion, compassion & empathy keep your child motivated with clarity of goal.

Next is to choose the Right Education for your child. Right education is the best investment that you will make for your child. Do not compromise. When you need best nutrition for your brain, you need almonds in your diet. Peanuts are no substitute. And you can't buy almonds at a price of peanuts. Do not put your child's career at stake for some money. Value for money is important and not flimsy discounts (even in the garb of scholarships). Scholarships & Rewards should be given by an institution only to recognise outstanding merit in students (definitely not for enticing the students & parents or poaching of students from other institutes to falsely claim results) and on a clear transparent basis.

**Remain involved with your child to support & motivate  
him / her through the entire journey until adulthood.  
It does not matter what your education level is.**

*You are capable of amazing things.*

**G**rowing materialistic outlook has degraded the Hallowed World of School Education. Search of parents for a school that can ✨ build fundamentals of their children ✨ create overall academic excellence in schools, boards, competitive & scholastic exams and without undue stress ✨ develop creative & strategic thinking ability, and proficient & confident communication skills ✨ inculcate strong value system ✨ inculcate sports & exercises as a way of life ✨ focus on mental, emotional, & spiritual well being ✨ instil spirit of exploration & entrepreneurship ✨ develop right personality traits & positive attitude required for success in life, has been elusive.

Though coaching has been helping the students score better in schools, boards, and competitive & scholastic exams, however it has taken most of the students away from holistic development & has generally caused unidirectional development of children. Mostly, such coaching does more damage to a child's life in the long run. At FIITJEE, we never focused on just results in scholastic & competitive exams but endeavoured for holistic academic development with enhanced creative & strategic thinking skills. That is the reason why FIITJEE students do well in colleges & then in life, including as an entrepreneur.

Our Integrated School Programs achieved beyond this for students & unlocked vital time for sports & extra-curricular activities. However, the need for Transformational Holistic Development from Nursery to class XII was still unfulfilled. **Launched in 2021, FIITJEE Global School, fills this vacuum and endeavours to provide Ideal School Education. We are committed to ensure that every student at FIITJEE Global School achieves a rewarding Career in any Stream of their choice in India or Abroad.**
